

## Super Six Annual Training Test

In an email, please start off with your full name, that you would like on the certificate. After that, just answer the questions. You do not need to write the questions or send them in this paper. Just place your answers in the body of an email. Only one test per email please. Let us know if you have any questions. Example below....

1. T
2. T
3. T
4. ETC.

Send your test to [stlcertificates25@gmail.com](mailto:stlcertificates25@gmail.com)

Name:

1. Four people must sign a medication release form for each medication.

True or False

2. If there are any uncertainties about administering the medication, contact the parents for instructions and record them on the release form.

True or False

3. Parental permission is not necessary for administering over-the-counter medications.

True or False

4. Use a proper medicine dropper or dosage spoon for accuracy. Regular silverware spoons are not suitable for measuring medicine.

True or False

5. You only need to store medicines out of the reach children. Anything else can be in their reach.

True or False

6. Children never have allergies to specific foods or additives, which can cause a range of reactions.

True or False

7. Milk and eggs are not common allergens.

True or False

8. If you suspect a child is experiencing an allergic reaction to food, discuss your concerns with the child's parents and encourage them to consult a doctor.

True or False

9. Have the child's parent and health care professional sign and date the food allergy plan, and keep a copy in the child's file, classroom, and food prep area.

True or False

10. You do not need to call the child's doctor if a child's face, neck, lips, or mouth becomes swollen.

True or False

11. A key strategy for preventing the spread of infectious disease is employing vaccines and other products that can prevent infections from occurring or spreading.

True or False

12. Your immune system is never on the lookout for invaders.

True or False

13. Encourage families to see their pediatrician for well visits and to discuss any questions they might have about vaccines.

True or False

14. Due to the potential for numerous injuries resulting from improper handling and storage of materials, workers must also be vigilant regarding accidents that can arise from unsafe equipment handling and improper work practices.

True or False

15. Always use required PPE; inspect it carefully before each use to make sure it's safe to use. Replace worn PPE; it won't provide adequate protection.

True or False

16. Make sure all containers are properly labeled and that materials are contained in an appropriate container.

True or False

17. Store all hazardous materials properly, separate incompatibles, and store in ventilated, dry, cool areas.

True or False

18. The Centers for Disease Control and Prevention highlights that injuries are never the cause of a child's death.

True or False

19. Child injuries are preventable and predictable, yet they remain one of the most overlooked public health challenges in our country today.

True or False

20. Active supervision is not the most effective strategy in creating a safe environment and preventing injuries among young children.

True or False

21. Before using any building for early care and education purposes, whether existing or newly constructed, renovated, remodeled, or altered, it should undergo inspection by a building inspector.

True or False

22. All accessible electrical outlets should be "tamper-resistant," featuring internal shutter mechanisms to prevent objects from being inserted.

True or False
